

## Monitor Me

The world's first wireless data logger is now available to catering services. Dickson's Wireless Wizard™ monitors critical environmental conditions: temperature, humidity, pressure and other electronic signals. The monitoring is done in real time from a desktop computer, which eliminates data downloading.

Dickson's Wireless Wizard's easy-to-use software manages all loggers from one desktop and sounds an alarm for out-of-range conditions right at your workstation.

For a 30-day trial, contact Dickson at 800.757.3747. More information on Dickson's Wireless Wizard can be found at [www.dicksondata.com/product/model\\_WH120.php](http://www.dicksondata.com/product/model_WH120.php).

## Toss It in Style

Make recycling beautiful with the new Rubbermaid Commercial Products' Silhouette line of recycling receptacles. Constructed of heavy gauge steel with a contemporary design, Silhouette comes in round or square models, and features a leak proof plastic liner and adjustable leg levelers. Each 26-gallon receptacle comes in textured black, silver metallic or desert pearl Uni-Coat® powder-coated finishes, or satin-finished stainless steel.

For more information, visit the Rubbermaid Commercial Products' Web site at [www.rcpworksmarter.com](http://www.rcpworksmarter.com).

## It's in the Mix

The first and only USDA organic-certified cocktail mixers, Modmix provides premium, organic cocktail options to the growing number of organic consumers. Made from pure organic ingredients, Modmix is available in five flavors: Pomegranate Cosmopolitan, Lavender Lemon Drop, Mojito, French Martini and Citrus Margarita. Just add your spirits of choice or combine with sparkling water for a refreshing non-alcoholic drink.
